## Meccaniche Veloci

Oddball Italian brand Meccaniche Veloci's new Only One collection comprises watches with dials made from discarded bits of broken cars, motorcycles, aeroplanes and helicopters. All standard models, meanwhile, benefit from subtle design improvements and greatly improved finish.

### Watch of the collection

The Quattro Valvole 42 Power Reserve (*above*) is the brand's first attempt at a complication. The time is read from a large, outer dial, while the four "valve" cutouts incorporate the brand logo, day and date windows and the power-reserve indicator.

From £3,000.
