

MECCANICHE VELOCI - Helmet Collection

In association with Suomy, the Italian leader in super sport motorcycle helmets, luxury watch maker Meccaniche Veloci launches a new collection of limited edition watches with dials featuring the most famous Suomy helmets graphics. This exclusive project gives the new range of watches the boldness of the helmets graphics.

These timepieces take inspiration from Suomy's four bestselling and representative designs including illustrations of pin-up girls, skulls, flags, dice and playing cards. The Helmet collection is produced in limited edition with each of the designs made in three different versions with only 250 copies available of each.

This design is inspired by American motorbike icons, driven by the passion for speed and challenges on the road. The dials feature skulls and crossbones, the American flag and beautiful, seductive women; a world of stars and stripes that evokes the 1960's Easy Rider culture of free spirits looking to evade conformity and cross limits.
